### ABOUT MOON AND ARIES

Moon and Aries is a transcontinental music duo creating somatic soul through cinematic expression. Their work moves between atmosphere and intimacy — music that is felt in the body as much as it is heard.

Formed in 2021 by Jordana Moon (Canada) and Tom Aries (Germany), the project began as a transcontinental collaboration rooted in intuition, emotional clarity, and shared artistic vision. Across electronic textures, trip-hop undertones, and organic instrumentation, their sound evolved through distinct chapters - each marking a stage of artistic transformation. Their music unfolds like scenes: spacious, emotionally attuned, and guided by restraint rather than trend. Blending evocative vocals with cinematic production, Moon and Aries create immersive listening experiences suited for reflective moments, visual storytelling, and narrative-driven media. Rather than overwhelming, their work invites presence — offering space for breath, stillness, and quiet emotional movement.

Their catalogue supports moments of introspection, transition, intimacy, and quiet emotional shift — making their work particularly suited for film, television, and narrative-driven media.

### THE EARLY CHAPTERS (2021–2025)

Between 2021 and 2025, Moon and Aries moved through three distinct sonic landscapes.

In March 2026, these formative works were curated and gathered into a cohesive trilogy:

- **The Becoming** - the electronic origin, shaped by synth-pop textures and melodic introspection.
- **The Portal** - a nocturnal trip-hop passage exploring shadow and atmosphere.
- **Time Travellers** - a cinematic journey across decades and genres, blending timeless moods with cosmic undertones.

Together, these three albums reflect the duo's artistic evolution prior to their current chapter, *Prairie Souls* (2026).

## ABOUT THE NEW SONG (BEYOND THE MIRROR)

Beyond the Mirror (March 6, 2026) is a quiet, cinematic introduction to the upcoming album *Prairie Souls*. Unfolding with restraint and spacious production, the song explores inner transition - the moment of stepping beyond fear into clarity. Built around emotional presence rather than trend-driven structure, it inhabits a timeless space between alternative, singer-songwriter, and atmospheric sound. Its subtle arc and reflective tone make it well suited for intimate film and television moments centered on transformation, introspection, and emotional resolution.

## CURRENT CHAPTER: PRAIRIE SOULS (2026)

Following the release of their early trilogy in March 2026, Moon and Aries turn toward a grounded evolution. *Prairie Souls* represents a grounded evolution. Expanding their cinematic language through organic collaboration and restrained production, the album marks a shift from electronic textures toward embodied, earth-centered sound.

## MEET THE ARTISTS

 **Jordana Moon** (Canada) – is a singer-songwriter, vocal coach, and creative writer from Western Canada. Her music is rooted in emotional presence and conscious expression, shaped by a deep sensitivity to language, tone, and inner experience.

With a background in creative writing from Vancouver Film School, Jordana approaches songwriting as storytelling - allowing lyrics and vocals to unfold with intimacy and intention. Her voice moves fluidly between strength and softness, creating space for reflection, connection, and quiet empowerment. Her artistic influences span jazz, trip-hop, neo-soul, and cinematic soul, drawing inspiration from artists such as Joni Mitchell, Lauryn Hill, Bee Gees, Portishead, and Massive Attack. In recent years, her work has evolved toward a more organic and grounded expression, embracing stillness, breath, and emotional honesty as central elements of her sound.

 **Tom Aries** (Germany) – is a composer and producer from Western Germany, blending classical piano foundations with electronic and organic sound design. His musical language is shaped by structure and intuition — where precision meets atmosphere. With experience in film scoring and video game music, Tom brings a cinematic sensibility to Moon and Aries' sound, crafting immersive environments that support emotion rather than overpower it.

His influences range from Depeche Mode, Kraftwerk, ABBA, and Portishead to the timeless textures' of 1980s electronic music. As Moon and Aries continues to evolve, Tom's production has expanded beyond synthesizers to incorporate guitar, saxophone, and tactile acoustic elements — allowing warmth, imperfection, and human presence to play a more central role in the duo's sonic identity.
